RCCE Exam Brochure

Introduction to Rocheston Department of Certification

Rocheston Department of Certification (**RDoC**) **offers very high-quality examinations and certifications, designed to ensure candidates have the knowledge and skills to successfully deal with the current dynamic global business landscape.**

RDoC's Certification programs are designed to foster innovation, create excellence and comply with standards. The certification examinations are designed to assess competence based on, and consistent with, the scheme, by written, oral, practical, observational or other reliable and objective means.

For more information about RDoC,
please visit the website at https://cert.rocheston.com .

What is the RCCE Certification Exam ?

The **Rocheston Certified Cybersecurity Engineer (RCCE) is the flagship certification** program offered by the RDoC. The RCCE certification exam tests the candidates on the most advanced cutting-edge hacking and intrusion techniques.

The scope of the **RCCE Certification scheme is to introduce, educate and demonstrate basic concepts of cybersecurity policies and governance, risks/threats/vulnerability assessment, risks/threats/vulnerability management and security incident response and recovery plan tools for cybersecurity testing purposes only.**

All certified candidates pledge to fully support the Code of Ethics. Any violation of any provision of the Code of Ethics will be subject to action by a review panel, which can result in the revocation of the certification. **The candidate will not exploit the acquired skills for illegal or malicious attacks and will not use such tools in an attempt to illegally compromise any computer system.** The candidate must agree to comply with all applicable local, state, national and international laws and regulations in this regard.

What is the RCCE Certification Exam ?

The RCCE certification scheme focuses on securing the information technology assets of an organization including protection of networks, computer systems, programs and data (structured and unstructured) from unauthorized access and malicious threats.

The certification scope will be analyzed every 2 years and evaluation will be made to decide on the change if any in the scope of certification.
